

**Imagine having
to tell one...
that the other
didn't survive.**

**If a fire occurred in your home tonight,
would your family get out safely?**

Develop a home fire escape plan. Know what to do when the smoke alarm sounds. Sit down with everyone in your household and discuss how each person will get out of the home in a fire.

Practice your escape plan with everyone in your home. Make sure everyone can get out quickly.

Make sure no one gets left behind.

SMOKE ALARMS

- Working smoke alarms give you and your family time to get out.
- Smoke alarms must be installed on every storey of the home and outside all sleeping areas.
- Alarms expire - check the date on yours and replace when required.
- Replace the smoke alarm batteries once a year, or consider installing the 10-year sealed battery alarms.

CO ALARMS

- If your home has a fuel-burning appliance or an attached garage, you must have a carbon monoxide (CO) alarm installed outside all sleeping areas.
- Test your CO alarm once a month by pushing the test button.
- Replace the alarm batteries once a year and replace the alarm by its expiry date.

HOME ESCAPE PLAN

- Create a home escape plan with 2 ways out of every room.
- Practice the plan with the whole family - including pets.
- Choose a safe meeting spot outside of the home or dwelling.
