

Quinte  
CONSERVATION

# Planning Information & Fees

Under the Planning Act, Municipalities are required to circulate planning applications to appropriate agencies for review. The Conservation Authorities of Ontario have been delegated responsibility for the Natural Hazards section of the Provincial Policy Statement which guides Municipalities in Planning Act review and approvals.

Natural hazards include:

- Flooding
- Erosion
- Unstable Bedrock and Soil

Quinte Conservation staff review applications with respect to the most current technical guidelines, studies and professional opinions in order to ensure that applications are consistent with the Natural Hazard policies of the Provincial Policy Statement.

The fee structure below has been approved by the Quinte Conservation Executive Board which is made of members of council or delegates from the 18 local municipalities which we serve.

Often staff are requested by our member municipalities to review other reports prepared for planning applications. Such reports include environmental impact, hydrogeological and stormwater management reports.

Quinte Conservation reviews planning applications with respect to the Ontario Clean Water Act, Source Protection Studies, and Risk Management Reports.

## NOTES:

Where several applications are applied for concurrently from the same parent parcel (i.e.

two severed lots from one parcel; or consent and rezoning applications for the same severed parcel), only the higher applicable fee will be charged.

Subdivision and site plan reviews include any pre-consultation meetings, site investigations, draft plan comments, peer reviews of environmental impact, hydrogeological and stormwater management studies, Ontario Regulation 319/09 permits, and clearance of draft conditions.

## PLANNING FEES:

(Fees are subject to change)
